

B. NIHANTH

Java Full Stack Developer | Generative AI Enthusiast | Spring Boot | AWS

Andhra Pradesh, India

📞 +91-7794085626 ✉️ nihanth1006@gmail.com [🌐 LinkedIn](#) [🐙 GitHub](#) [🌐 Portfolio](#)

Summary

- Java Full Stack Developer with experience building web applications using Spring Boot, React.js, REST APIs, and AWS. Developed and deployed multiple projects focused on AI integration, responsive UI, and backend optimization. Skilled in Java, database management, cloud deployment, and API development, with hands-on experience in Generative AI applications and collaborative development workflows..

Education

KL University

2023 – 2027

Bachelor of Technology in Computer Science and Engineering (CSE) CGPA: 9.5 / 10

Andhra Pradesh, India

Experience

Frontend Developer Intern

Apr 2026 – Present

Grizo Labs

Remote

- Engineered and deployed 3+ responsive web applications using React.js and Next.js, enhancing user experience and performance.
- Built and launched **MockStep.com**, a placement preparation platform serving 1000+ users with structured learning and interview resources.
- Provisioned and hosted frontend applications on AWS (S3/Amplify), achieving 99.9% uptime and scalable delivery.
- Reduced page load time by 25–35% via server-side rendering (SSR) and component-level optimizations in Next.js.
- Orchestrated 5+ REST API integrations to enable real-time data updates and seamless user interactions.
- Designed interactive UI for an AI-based interview module and integrated AI APIs for automated feedback.
- Collaborated in Agile sprints, accelerating feature delivery by 20% while maintaining code quality using Git/GitHub workflows.

Research Committee Executive Lead

2025 – Present

Research Club

KL University

- Directed a team of 10+ members to plan and execute research initiatives, workshops, and technical sessions.
- Organized 5+ research events and guided students in paper writing, project development, and publication processes.
- Mentored 20+ students in AI and machine learning, increasing research participation by 30%.
- Partnered with faculty and industry experts to facilitate knowledge-sharing sessions and technical discussions.
- Streamlined research workflows and documentation, improving team productivity and operational efficiency.

Projects

Salvii AI — Voice-Enabled AI Assistant | Spring Boot, React.js, MySQL, Whisper AI, REST APIs, Generative AI

- Developed a voice-enabled AI assistant that converts speech into text using Whisper AI for real-time query processing and interaction.
- Built backend services using Spring Boot and integrated Generative AI APIs to generate intelligent responses dynamically.
- Designed responsive frontend interfaces using React.js and implemented RESTful APIs for seamless communication between frontend, backend, AI services, and MySQL database.
- Optimized backend performance and caching strategies, reducing API response latency and improving application efficiency.

Smart Autonomous EV Delivery System | Java, Spring Boot, Microservices, React.js, MongoDB, AWS

2025

- Architected an AI-driven autonomous delivery system leveraging route optimization algorithms, improving delivery efficiency by 30%.
- Implemented real-time communication using CAN protocol, achieving sub-millisecond latency across vehicle subsystems.
- Built a scalable microservices-based monitoring dashboard to process real-time telemetry data using React.js and MongoDB.

MockStep — Placement Preparation Platform | React.js, Next.js, AWS, REST APIs

2026

- Built and deployed a full-stack placement preparation platform serving 100+ users with structured learning modules and interview tools.
- Integrated dynamic UI components and REST APIs for real-time content delivery, enhancing user engagement and performance.
- Deployed on AWS (S3/Amplify) ensuring high availability, scalability, and optimized load performance.

FindMyItem — Lost Item Recovery Platform | *Spring Boot, React.js, REST APIs* **2024**

- Developed a full-stack lost-and-found platform adopted by 500+ users, improving item recovery efficiency by 35%.
- Implemented advanced search and filtering algorithms, reducing item lookup time by 40%.
- Built scalable REST APIs for efficient data processing and retrieval using Spring Boot.

FocusGuard — Productivity Chrome/Edge Extension | *JavaScript, Chrome APIs, Web Extensions*

- Developed and published a browser extension on Microsoft Edge to block distracting websites and improve user productivity.
- Implemented real-time website tracking and restriction logic using browser APIs, enhancing focus and time management.
- Designed lightweight and efficient extension architecture ensuring minimal performance overhead.

Technical Skills

Languages: Java, C++, C, JavaScript

Frontend: React.js, Next.js, HTML5, CSS3

Backend: Spring Boot, REST APIs, Microservices, Hibernate ORM, JPA

AI / ML: Machine Learning, Deep Learning, Generative AI, LLM Integration

Databases: MySQL, MongoDB

Generative AI: OpenAI APIs, Claude AI, Whisper AI

Cloud / DevOps: AWS, Docker, Git, Linux

Tools: IntelliJ IDEA, VS Code, Postman, Prometheus, Grafana

Core Concepts: Data Structures, Algorithms, Distributed Systems, API Design

Soft Skills: Leadership, Problem-Solving, Team Collaboration, Communication, Critical Thinking

Research

Green Hydrogen Generation using Nanomaterials and Machine Learning | *Published Patent, IPASS India* **2025**

- Proposed an AEM-based hydrogen production approach using quaternary nanomaterials combined with machine learning models to predict catalytic efficiency.
- Enhanced material performance and experimental accuracy by applying AI-driven optimization techniques.
- Integrated nanotechnology with machine learning to develop efficient and sustainable hydrogen generation systems.

Certifications

- **AWS Certified Cloud Practitioner** — **Oracle Cloud Infrastructure Foundations Associate** — **Frontend Developer (React.js)** — **Java Programming** — **Problem Solving**

Leadership & Achievements

- Orchestrated 40+ technical events, hackathons, and research workshops, increasing student participation by 45%.
- Qualified for Round 1 of the **Adobe India Hackathon**, demonstrating strong problem-solving and technical skills in a competitive national-level environment.
- Competed in national-level hackathons including the **IIT Madras Shaastra AI Hackathon**, gaining hands-on experience in AI-driven problem solving.
- Led and contributed to multiple team-based projects, demonstrating leadership, collaboration, and critical thinking.
- Recognized for consistent contributions to research initiatives and active participation in technical communities.
